

VALOREM SERVICES

VALOREM is the first independant green energy operator on French market. Pioneer, VALOREM Group has been developing renewable energy projects for 20 years on its own behalf or on behalf of third parties.

Now vertically integrated, VALOREM provides services at every step of your project or your existing installation in Europe, Africa, Asia and Caraibes.

Engineering

- Renewable energy project prefeasibility studies
- Technical layout
- Wind and Solar assessment

Development

- Renewable energy project development assistance
- Equipment consultancy
- Weak grid auditing
- Electric grid auditing

Construction

- Transport
- Assembly
- Construction project management
- BOP turnkey
- Commissioning

Operation

- Operation
- Maintenance
- Renewable energy PMS
- Supervision

- Wind turbine generator (WTG) inspection
- Thermographic control
- Periodical regulatory control of collective protection equipment, winch and elevator
- Quality analysis of the electrical grid
- Management and solution of TV disturbances
- Audit and optimization of the telecommunication network
- Implementation of a teleprocessing tool for the substation operation
- Analysis of the contractual organisation (costs, warranties, services, liability)
- Performance analysis
- Analysis and reporting of EHS (Environment, Health and Safety) tools
- Organization and optimization of acoustic campaigns
- Analysis and optimization of the Operational Expenditure
- Runway Lighting

Expertises

- Training
- Project auditing

References

Development

- + 780 MW wind energy
- + 140 MWc solar energy

Construction

- + 530 MW

O&M

- + 400 MW in operating
- + 350 MW in technical assistance
- + 120 MW in maintenance
